使用第三方原生组件

高德地图

https://github.com/qiuxiang/react-native-amap3d

给第三方打补丁的方法

- fork
- patch-package

地图的使用

- 申请key,安装配置
- 获取定位
 - o ios模拟器默认定位在美国苹果总部
 - o 函数限流
- 根据当前位置添加图片标记

添加拍照识别按钮

• 使用redux-saga解耦逻辑

WebView

- 安装与配置 https://github.com/react-native-community/react-native-webview/blob/master/d
 https://github.com/react-native-community/react-native-webview/blob/master/d
 https://github.com/react-native-community/react-native-webview/blob/master/d
 https://github.com/react-native-community/react-native-webview/blob/master/d
 https://github.com/react-native-webview/blob/master/d
 <a href="https://github
- 常见问题 https://github.com/react-native-community/react-native-webview/blob/master/docs//s/Guide.md

WebView 的调试

https://github.com/react-native-community/react-native-webview/blob/master/docs/Debugging.md

- safari 调试
- chrome 调试

WebView 通信示例: 动态标题

https://github.com/react-native-community/react-native-webview/blob/master/docs/Guide.md#communicating-between-js-and-native

- 注入脚本去除内置头部
- 回传标题
